LaTeX-Beamer Style for NTNU

Documentation.

Ronny Bergmann
May 13, 2021

Introduction

The available options

Option	Default	Description
`displayframetotal`		the same as frametotal=true!
`frametotal=true|false`	`false`	toggle display the total number of slides
`hideframetotal`		the same as frametotal=false!
`slogan=english|norsk`	`norsk`	whether to display english or norsk slog
`style= ...`	`plain`	styles, see slide 3

Outer themes

The corporate design team provides four variants (outer themes in latex beamer speaking)

NTNUcircles using circles in the background (not yet available)

NTNUplain a very plain style (Default)

NTNUstripe with a stripe on the left (current)

NTNUstripebottom with a stripe at the bottom

While you can set this using e.g. `\useoutertheme{NTNUcircles}` and `\useinnertheme{NTNUcircles}` in your preamble, the easier way is the option `style=circles|plain|stripe|stripebottom`

special commands

titlelogo Set the logo on the title page. By default it is set to the negative english or norsk logo (depending on the chosen slogan), see the slogan option

Special colors

NTNUblue
NTNULightblue
NTNUOrange
NTNUPink
NTNUYellow
NTNUViolet
NTNUCyan
NTNUOcher

Required packages

The following packages have to be installed for the theme to work

calc for a few computational tricks

ifthen to define some commands

pdftexcmds to define some commands

opensans for the font

tikz for some graphic tricks

This documentation further uses

booktabs for nice tables

listings for code highlighting
